## Temperature Ratings

316 Stainless      -325°F to 1200°F      (-198°C to 648°C)

## Tube Pressure Derating Factors at Elevated Temperatures

The following table lists derating factors that must be considered in applications above that of ambient temperatures.

Temperatures		Multiplier Factors			
° F	° C	304 SS	316 SS	Copper	Carbon Steel
200	93	1.00	1.00	0.80	0.95
400	204	0.94	0.97	0.50	0.86
600	315	0.82	0.85		0.77
800	427	0.76	0.80		0.59
1000	538	0.69	0.77		
1200	649	0.30	0.37		

### Example

Type 316 Stainless Steel  $\frac{1}{4}$ " O.D x 0.49" wall at 800°F is..... 7,500 PSI X .80 = 6,000 PSI

Therefore, the suggested allowable working pressure for 316 Stainless Steel –  $\frac{1}{4}$ " O.D. with 0.49" tube wall – at 800°F is 6,000 PSI

These charts are to be used as a guide only and are base don normal wall thicknesses, used for the various sizes. These ratins may vary widely from effects such as the proper use of sealants, size of stock, temperature, corrosion factors, etc. WADING-LOK Tube Sainless Steel Inc., assumes no responsibility for its accurarcy in any individual design,

### Tubo de instrumentacion estandar

#### Estandares del material

Grado	UNS	ASTM	ASME
316 / 316L	S31600 / S31603	A213 <sup>o</sup> / A269	SA213
304 / 304L	S30400 / S30403	A213 <sup>o</sup> / A269	SA213

<sup>o</sup> Espesores de pared nominales, no minimos

#### Pocentajes de composicion quimica

Elementos	Grado del material	
	316 / 316L	304 / 304L
	Composición, % del peso	
Cromo	16,0 a 18,0	18,0 a 20,0
Niquel	11,0 a 14,0	8,0 a 11,0
Molibdeno	2,00 a 3,00	-
Manganoso	2,00 max	2,00 max
Silicio	0,75 max	0,75 max
Carbono	0,035 max <sup>o</sup>	0,035 max <sup>o</sup>
Azufre	0,030 max	0,030 max

## Raw Material Specifications

Fitting Material	Bar Stock	Forging	*Tubing Specification	Maximum Specification hardness (Tubing)
<b>Stainless Steel</b>	ASTM-A276 ASME-SA-479 Type 316-SS	ASME-SA-182 Type 316-SS	ASTM-A213 ASTM-A269	80 Rb

## Gas Service

Extra care must be taken when tubing is used in gas service applications. Small gas molecules easily escape through minute leak paths, therefore, the tubing must be free of nicks, scratches and imperfections of any kind. In particular, when using large diameter tubing the possibility of surface defects is increased due to greater surface area. It is strongly recommended that the heavier wall thicknesses be selected.

### Values in reverse tex are not recommended fo Gas Service

Note: Tables, calculated to the right, are suggested maximum working pressure ratings, in accordance with ASEM B31.3, but should be used for reference only is not responsible for its accuracy nor designs using these figures. All compatible WADING-LOK fittings will withstand pressures above those listed for maximum tubing working pressures.

It is the responsibility of the Engineer to refer to the technical pages in this catalog to ensure selection of the proper tubing material, tubing compatibility with the fitting, media and tubing wall thickness. Following the stated recommendations will ensure a safe application, free of leaks, The entire system must be considered when selecting the tube.

### SUGGESTED ALLOWABLE WORKING PRESSURE TABLES (psig)

75,000 PSI

Tensile

50											150	180	210	240

**Note: For welded and drawn tubing, a derating factor must be utilized.**

**For double welded tube, multiply the above pressure rating by .85; and for single welded tube by .80 (ANSI B 31, Table A-1B).**

## WADING-LOK STAINLESS TUBE CO., LTD

### Selección segura de componentes

Para garantizar un rendimiento seguro en sus aplicaciones y en el diseño de su sistema, debe considerar la selección segura de los componentes. La función que cumplirán los componentes, la clasificación de los componentes, la compatibilidad de los materiales, la instalación adecuada, el funcionamiento y el mantenimiento son responsabilidad exclusiva del diseñador del sistema y del usuario. Wading-Lok no asume ninguna responsabilidad por cualquier selección, instalación, operación o mantenimiento insdecuados.
